### **ABSTRACT**

*In ancient time when libraries were established, the material of the library was handwritten and called manuscripts. With the introduction of printing technology, the material acquired in the library was in print form. As time changed by and information communication technology came into the light, it influenced each and every area of the society and libraries were one of them. With the help of information communication technology, libraries started providing advanced services to the users. With this advanced changed the printed material of the library converted into E-resources.*

**KEYWORDS:** *Electronic Resources, E-Databases, E-Book, E-Journal, E-Patent, E-Newspaper, E-Magazines, ETDs*
