ABSTRACT

M. Qashqary – the author of the first encyclopedic dictionary in Turkic world «Diwan lugat at-Turki». M. Qashqary in his dictionary followed the principles of compiling dictionaries in Arabic lexicography, namely the principle based upon morphological uazns used in the dictionary of Ishaq al-Farabi «Diwan al-Adab». However, considerable differences between Arabic morphology and Turkish morphology negatively impacted the successful compilation of M. Qashqary's dictionary. In the article, Turkish uazns used by M. Qashqary are analyzed, and research in correlation with Arabic uazns is conducted.

KEYWORDS: Dictionary, Turkish, Arabic Morphology, Uazn, Ism, Verb (fiʿl), Auxiliaru Word (Harf)
