### ABSTRACT

The main purpose of this paper is to investigate the changes of the word which is Moaraba "Translated into Arabic" after the translation from its original language into another one. The results of this paper are applied on Arabic language and the paper shows the changes to the foreign vocabularies as Persian from changes. As well as, this paper is concentrating on the vocabularies that they are Arabic originally but they are used in other languages as Kazakh and the changes that happened. The results of the paper proved that the language as a social phenomenon goes in one way in its development.
