### **ABSTRACT**

*This research paper is made to examine the views of the people of modern India which is based on empirical research. The present research is based on a good deal of primary and secondary data obtained from respondent's demographic characteristic, i.e. age, sex, caste, education, family type income and occupation in relation to polio eradication programme (PEP) applied on them. The research data is collected by preparing a schedule through stratified sampling method. An interview schedule was prepared and was applied to 600 respondents in which 300 belonged to urban areas and rest 300 respondents belonged to rural areas. The area of the sample is District Aligarh of Uttar Pradesh state of India.*

**KEYWORDS:** *Polio, Respondent, Demographic Factors, Paralysis and Disease*
