### **ABSTRACT**

*The role of the academic library is becoming very important in the 21<sup>st</sup> century. Society and government expect the progressive information from the academic libraries having an excellent potential of information with adopting best efforts or practices in generating and delivery of knowledge. NAAC has served the concept of best practices for academic libraries multiple angles and academic libraries have initiated handy programmes for users with an absolute clutch of information technology. Several innovations regarding the library resources, delivery services administrations have the changed the scenario of the academic libraries and today contributing national development to become the significant factor of change in the society.*

**KEYWORDS:** *Generating and Delivery of knowledge, Impact on Organizations*
