ABSTRACT

Cheating in exams is a worldwide phenomenon perpetuating at all levels of education - primary, secondary and tertiary levels. This has serious consequences on the education system and students' life in their social and educational and psychological values. The study was designed to highlight certain facts related to Cheating in exams, i.e., the extent of incidences of such undesirable behavior - at the college level in the Churachandpur district in the state of Manipur, India. The study had also aimed to determine the various methods and forms of cheating adopted by the college students and the various consequences or action imposed upon on such undesired behavior of the students.
